

VISUALIZE WITH ME...

Digital Divide in the USA has Narrowed

Realities of the Digital Divide Elsewhere

Over **2.6 billion people**, or 34% of the world's population, have **NEVER** been online

Over **263 million students**, 25% of them pre-adolescent, are not attending any type of education

Over **3 billion people** do not have access to the **Internet**, and if they did, it is neither reliable or affordable

Over **2 billion people worldwide**, 600m alone in Africa, have no access to power as we know it

Past efforts **ATTEMPTED** to meet the need

- **Laptop for Every Child** - Nicholas Negroponte, \$100 computer for all
- **Free Internet for Everyone** - Facebook/Meta, Free Internet for all

LearningSpots can deliver today because

- content creation tools exist
- specialized multi-purpose hardware exists
- satellite with affordable return connectivity exists
- affordable smart devices exist

...there is a shared mission

LearningSpots FILLS THE NEED

Shared Mission:

Enabling the flow of large volumes of digitized educational content to students living in the **remotest areas of the world... without they requiring an Internet connection...**

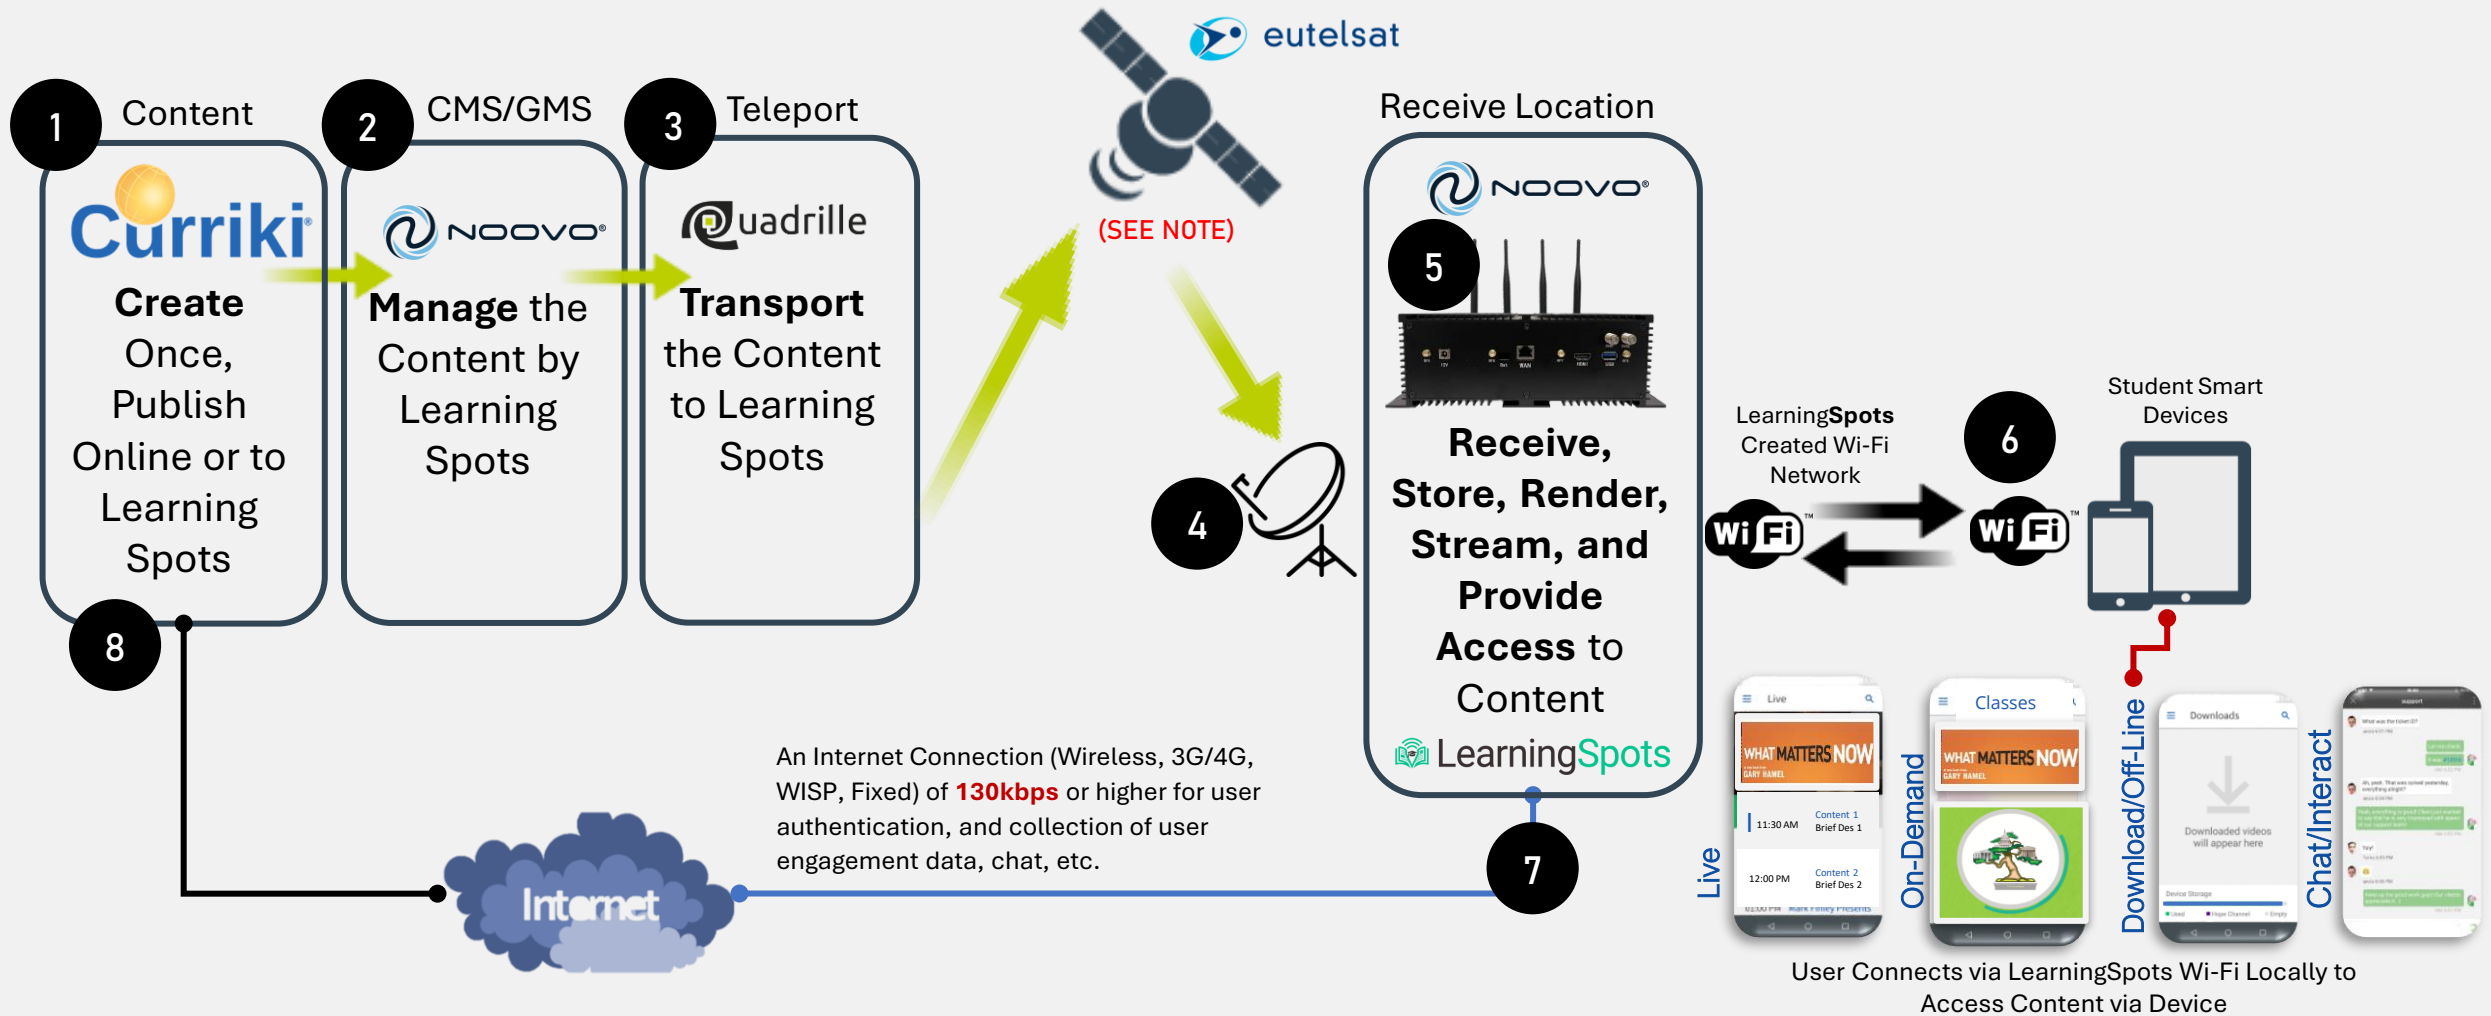

...to students located where **connections are non-existent, inadequate or unaffordable.**

The 'Four Pillars' of LearningSpots

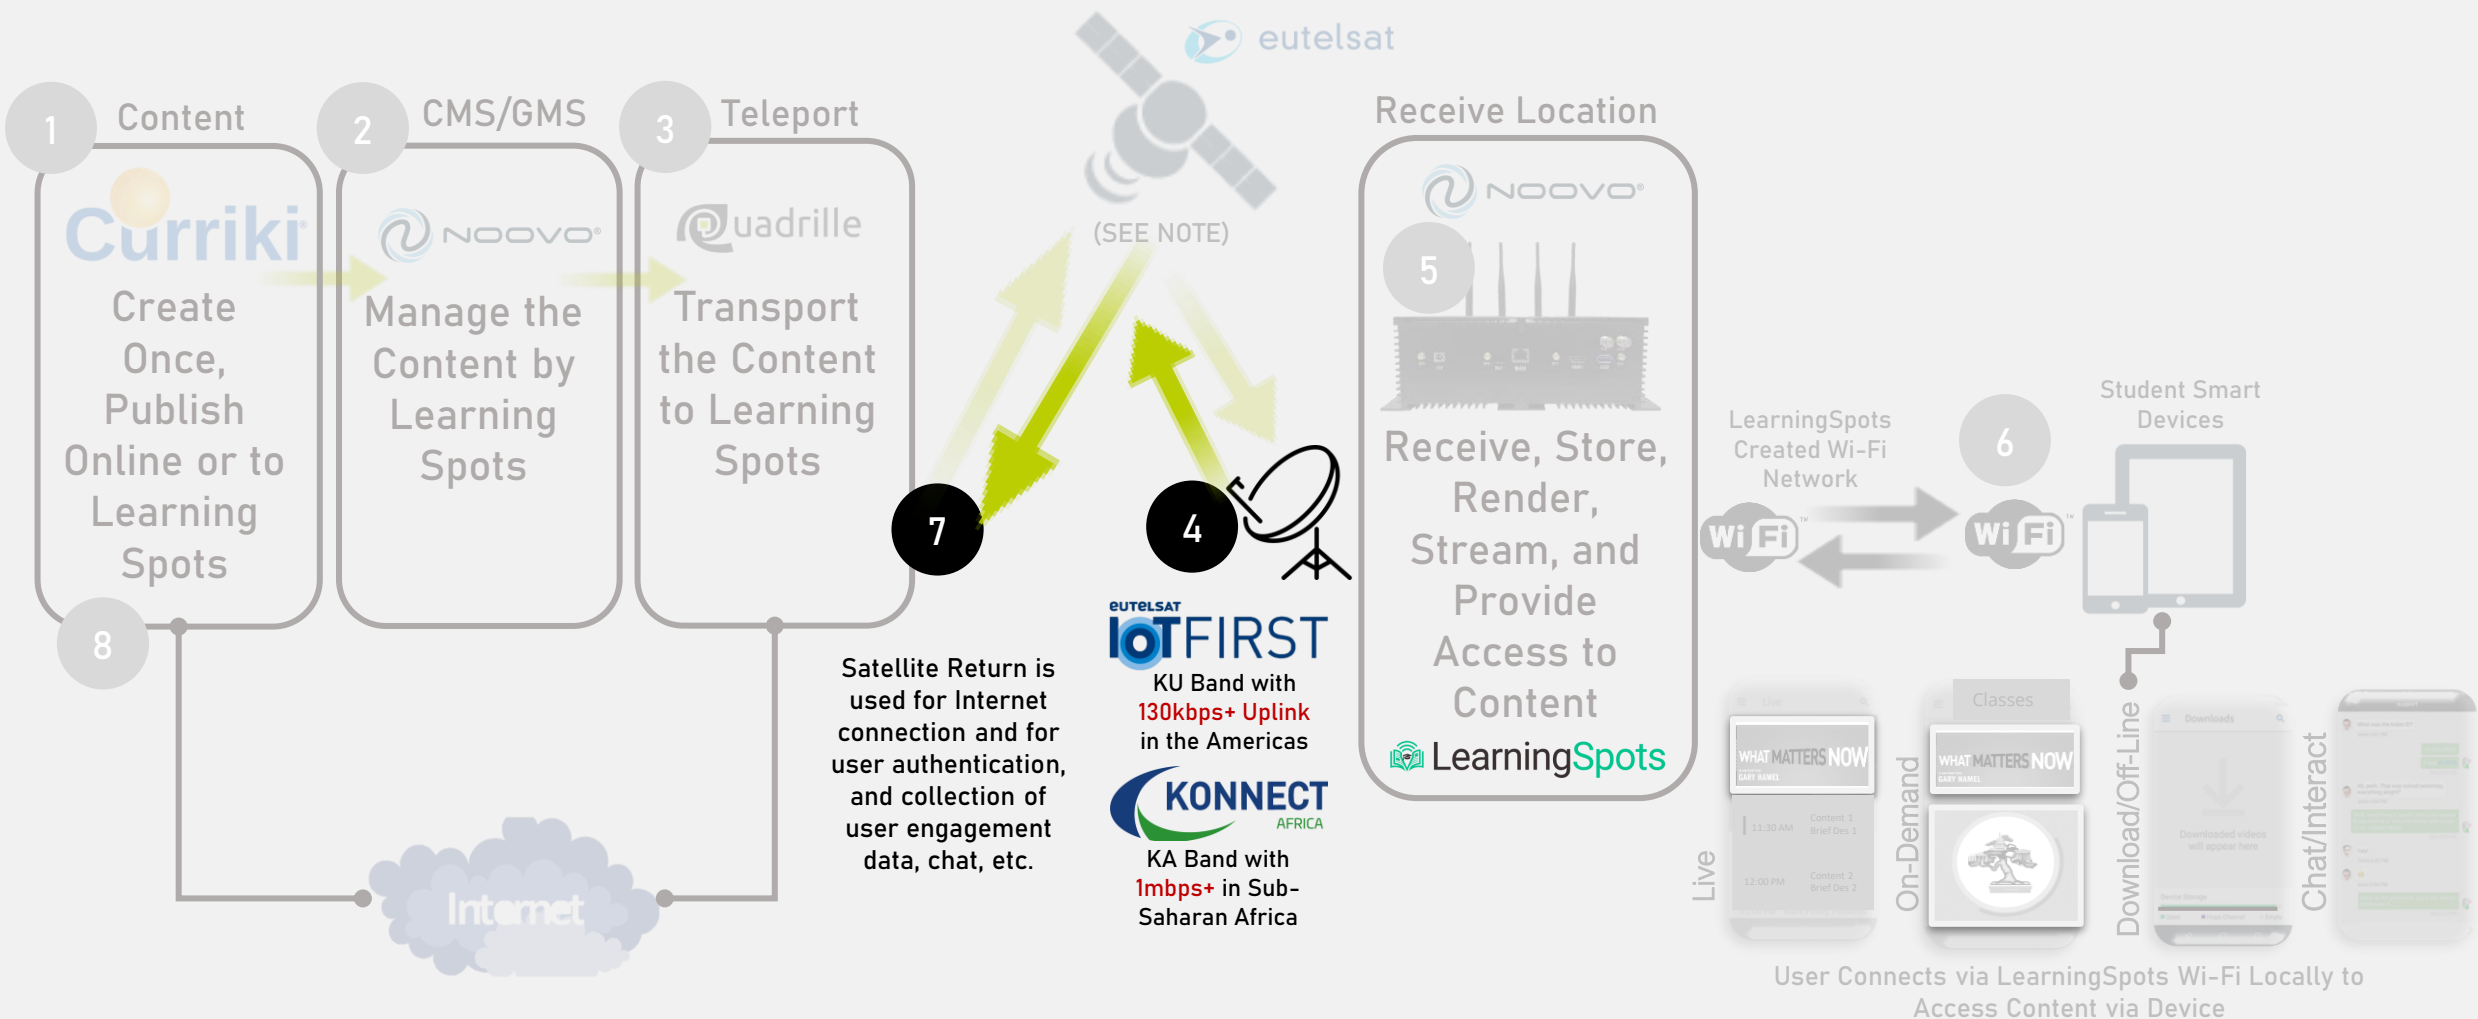

So, how does it work?

LearningSpots ...Some Internet Access

NOTE: We have working relationships with Eutelsat, but, the actual satellite used can be ANY satellite having KU band capacity and serving the right target geographic region

LearningSpots... Anywhere

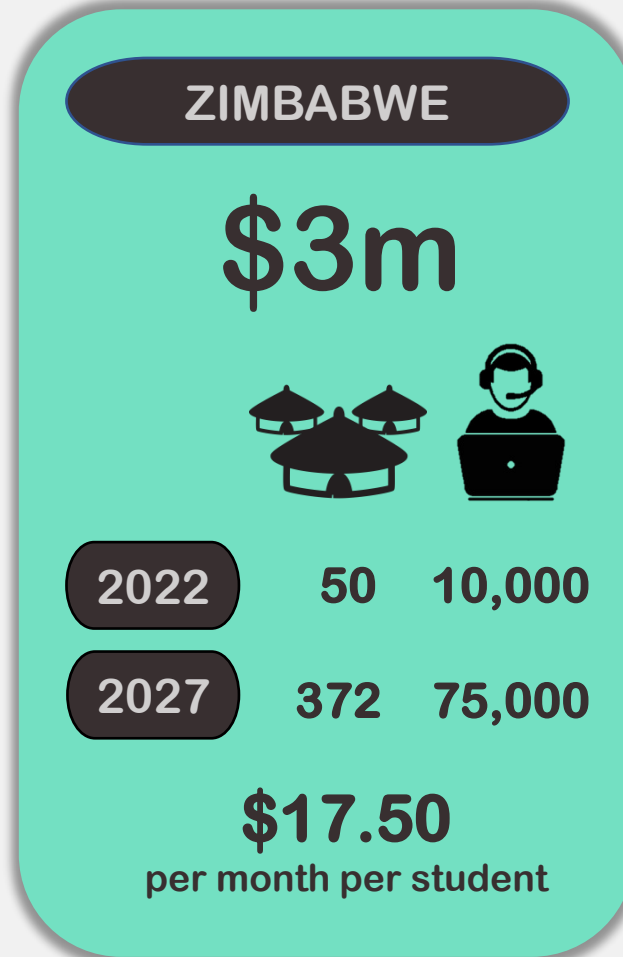

NOTE: We have working relationships with Eutelsat, but, the actual satellite used can be ANY satellite having KU band capacity and serving the right target geographic region

“Let’s Enable Villages”...

Where? Zimbabwe

- Population
 - **Nationally** 15.2m, **5.6m are kids***, and **3.5m are remote**
- No Power
 - **Nationally** 8.9m, **3.2m are kids**, and **2m are remote**
- No Access to Internet
 - **Nationally** 10.6m, **3.9m are kids**, and **2.4m are remote**
- No Access to Schools
 - **Nationally** **4.8m kids**, and **2.9m are remote**

* Kids defined as Students Age of 5-18

Impact in Zimbabwe?

- In **6-8 months** - **50** LearningSpots and **10,000** students
- **Off-grid solar powered** with battery back-up for the LearningSpots
- Business Model of \$17.50 per month per student is **self-sustaining** and allows LearningSpots to grow more villages and enable more students, including a new laptop every 2 years
- In **5 years** – **372** LearningSpots and **75,000** students

Let's Make an Impact!

LearningSpots can deliver an 'Internet-like online education experience' to a child that

- lives anywhere
- doesn't have power
- doesn't have access to the Internet
- doesn't have access to a nearby school
- and is financially challenged

Let's Partner

- Education Content Creator
- Technologists
- EdTech Providers
- Departments of Education
- Grant Writers
- Philanthropists
