## Core curriculum for the dialysis technician

WordPress-powered Reactive Theme The Basic Curriculum is the industry's first comprehensive training tool to help dialysis technicians and nurses learn how to provide safe, sensitive and high-quality care to people with end-of-life kidney disease. The colour modules, easy to read, referenced and illustrated, cover patient topics, infection control, professionalism, procedures, dialysis principles and vascular access to equipment, water treatment and emergency planning. An indispensable resource for each training program for technicians and the dialysis clinic. The core program covers physiology, chemistry, the psychology of kidney failure, life on dialysis, and technology, including water treatment, safe cannulation, and equipment. It helps teach new dialysis technicians and nurses to be competent and compassionate caregivers who understand what to do and why.
