940922 uefi serial number on nt are all possible wrong codes. What does "authentication error" mean? I am the partition you made so I can't format and make new one. A: It's difficult to tell for sure without seeing the code, but it's most likely the reason why you get this error. It looks like you used the wrong password to decrypt the MBR, or you used the wrong password to decrypt the master boot record. Gennady Zagorodnikov, a top member of the Russian Duma's Committee for State Regulation of Communications, slammed the law as "a terrible idea," and argued that it is "a set of disadvantages for all the subscribers, but also those, who have nothing to do with the law, pay for it." The law was first introduced by the Ministry of Culture in August 2016 and was passed in Russia's upper house of parliament the following May. The decree is required to be published in the official federal register of laws and decrees. According to the law, violators will be fined a minimum of one million rubles (\$16,835) and up to five million rubles (\$84,500) for repeat violations. The punishment will be increased to as much as 20 million rubles (\$305,000) if the user is identified as a repeat offender. Zagorodnikov suggested that the law could actually lead to a decrease in the number of Russian internet users. "The more popular the service is, the less chance there is that it would get into trouble," he said. Zagorodnikov went on to criticize that fact that the legislation does not address the negative effects of piracy on the economy. "If you look at it from a pure economic angle, the law will have a completely different result," he said. "If an industry is hit by piracy, it creates a lot of problems, but it doesn't destroy it. However, if an industry is kept in good shape by copyright, then it benefits the society as a whole. Without copyright, there is no Internet, no mobile services, no education — there is nothing. So the law is designed to benefit the society in general," he added. The bill was introduced on a fast track, with a report written by lawmakers in October and not a single day of debate in the Duma. According to government estimates, the Internet industry has annual revenue of over \$10 billion and 520fdb1ae7
