

# **POLIX POWER**

## **Reward Engine**

# 1. POLIX POWER

**POLIX is a project aiming to build a next-generation global prediction market ecosystem where future information and probabilities are traded.**

Far more than a simple rewards site, POLIX is structured to ultimately seamlessly connect users to a full-scale future prediction platform by securing early participants, providing prediction game experiences, building a robust community, and expanding the POLIX ecosystem.

In the initial phase, users are acquired through a dedicated POLIX Power Reward Site.

Members purchase POLIX Power using USDT and receive daily THBC rewards based on their held POLIX Power and their level of participation in mini-prediction games.

POLIX Power is the digital power purchased to participate and earn THBC rewards within the POLIX Power Reward Site.

## 2. POLIX Power Reward & Future Prediction Training

**POLIX is designed to first acquire early participants through the POLIX Power Reward Site, which then naturally onboard them onto the main future prediction platform.**

Rather than being a mere rewards platform, the POLIX Power Reward Site serves as an initial engagement, educational, and experiential space designed to drive user traffic into the future prediction platform.

Through the reward site, members first experience purchasing POLIX Power, participating in THBC rewards, and playing mini-prediction games.

Once the main future prediction platform officially launches, existing participants will be smoothly transitioned into the full-fledged prediction ecosystem.

# 3. Asset Structure: THBC & POLX

**Members can sign up via a referral link, deposit USDT, and purchase POLIX Power to start participating in the reward program.**

Daily THBC rewards are distributed based on the member's POLIX Power holdings and their mini-prediction game participation metrics.

Distributed THBC can be staked with flexible deposits and withdrawals, and THBC staking participants are eligible to receive additional daily POLX rewards.

# 3. Asset Structure: THBC & POLX

**USDT**  
The base asset used to purchase POLIX POWER

**POLIX POWER**  
The metric used for THBC reward participation and tier calculation

**THBC**  
THBC: Used for daily rewards, staking participation, repurchasing POWER, etc.

**POLX**  
POLX: The main token utilized within the Future Prediction Platform

#### 4. Maximum THBC Reward Limits by POLIX POWER Tier

Tier 1	100 ~ 2000 POWER	250%
Tier 2	2100 ~ 5000 POWER	280%
Tier 3	5100 ~ 8000 POWER	300%
Tier 4	8100 ~ 10000 POWER	330%
Tier 5	10100 POWER and above	350%

**1 POLIX power = 1 USDT**

**Available for purchase starting from 100 POWER, in increments of 100.**

- ✓ Once the reward limit is reached, additional POWER must be purchased to continue.
- ✓ POWER can be continuously repurchased using USDT, THBC, or POLX (repurchases are also available in increments of 100).
- ✓ THBC generated through the reward program counts toward the maximum reward limit.

# 5. THBC Reward Rates by Mini-Prediction Game Participation

A total of 3 mini-prediction games are available on the POLIX Power Reward Site; the next day's THBC reward rate varies depending on the number of games played.

The reward rate is calculated based on the *number of games participated in* during the day, regardless of whether the predictions were correct or incorrect.

These games are intended solely for educational and training purposes. No penalties or extra benefits are applied based on the win/loss outcome of the predictions.

- ✓ 0 games: No rewards
- ✓ 1 game: 0.1~0.5%
- ✓ 2 game : 0.6~1.0%
- ✓ 3 game : 1.1%~ 1.5%

- Easy difficulty—requires only about 3 simple clicks.
- THBC is distributed based on total POWER (e.g., holding 1,000 POWER and playing 3 games applies a 1.5% reward rate, resulting in a payout of THBC equivalent to \$15).

# 6. THBC Staking & POLX Reward Structure

**Users can stake their distributed THBC directly within the POLIX Power Reward Site.**

THBC staking can be unstaked at any time and carries no reward limits.

Members can stake their THBC at any moment and flexibly unstake a partial or full amount whenever needed.

Staking participants receive daily POLX rewards based on operational standards, with the daily reward rate ranging between **0.5% and 1.0%**.

This structure is designed to increase the number of THBC holders while naturally driving staking participants into the broader POLX ecosystem.

# 7. THBC Operations & Settlement Withdrawal System

**THBC rewards are valued at a fixed rate of 1 THBC = 0.025 USDT.**

Prior to the opening of external trading, held THBC is settled and withdrawn based on its pegged USDT value.

When withdrawing settled THBC, users can choose to pay the withdrawal fee in either THBC or POLX.

**Direct THBC withdrawal fee: 30%**  
**Fee paid in POLX: 10%**

Staking THBC to acquire POLX yields additional rewards and offers significant fee reduction benefits.

POLX can be withdrawn to external wallets and traded freely.

- ✓ Before external trading opens, held THBC can be settled based on its USDT value, and the settled USDT will be deposited directly into the member's external USDT wallet.
- ✓ POLX can be withdrawn to a personal wallet and traded on decentralized exchanges (DEX).
- ✓ POLX cannot be deposited back into the POLIX Power Reward Site from an external wallet (it will be usable on the main Future Prediction Platform later).
- ✓ Only POLX distributed directly within the site can be used for POWER conversion purchases, withdrawals, and fee payments.

# Compensation Plan

## 8. Generational Referral Reward Structure

Grade	Held Power	Direct Referral Condition	Applicable Generation	Payout Rate per Gen	Cumulative Payout Rate	Max Cumulative Reward Rate
1grade	300	1	1 Level	5%	5%	5%
2grade		2	2Level ~ 3Level	3% each	6%	11%
3grade	500	3	4Level ~ 5Level	2.5% each	5%	16%
4grade		4	6Level ~ 8Level	2% each	6%	22%
5grade		5	9Level ~ 12Level	1.5% each	6%	28%
6grade	1000	6	13Level ~ 16Level	1.5% each	6%	34%
7grade		7	17Level ~ 20Level	1.5% each	6%	40%

- ✓ Generational referral rewards are calculated based on the daily THBC rewards generated within the user's downline.
- ✓ Reward levels unlock sequentially based on the number of direct referrals and held POLIX Power. Users can earn rewards up to 20 generations deep, with a maximum cumulative reward rate of 40%.
- ✓ Only accounts holding 100 POWER or more are recognized as active accounts.

## 9. Community Rank Reward Structure

Rank	Total Community Volume	Minor Leg Volume	Community Payout Rate	Distribution within 10% Reward Pool
V1	40,000	10,000	10%	
V2	100,000	20,000	20%	
V3	400,000	50,000	30%	
V4	800,000	150,000	40%	
V5	2,000,000	400,000	50%	50%/60 people
V6	8,000,000	1,600,000	60%	30%/25 people
V7	20,000,000	4,000,000	70%	20%/15 people

- ✓ Community Rank Rewards are unlocked only when both the Total Community Volume and Minor Leg Volume conditions are met
- ✓ Minor Leg Volume = The combined POWER of all legs, excluding the largest leg.
- ✓ V1 through V4 represent the early leader nurturing phase, while V5 through V7 are the top-tier leader ranks eligible to participate in the 10% reward pool based on operational performance after the platform launch.

**First-come, first-served benefits for V5 to V7 achievers**

- 10% Operational Performance Reward Pool
- Distribution: V5 (50%), V6 (30%), V7 (20%)
  - Allocated monthly based on platform performance metrics.
- V5: First 60 users
- V6: First 25 users
- V7: First 15 users

**Based strictly on the order of rank achievement**

# 10. Early Premium Participant Structure

Early Premium Participants purchasing 5,000+ POWER in a single transaction (First 50 slots): Eligible for POLX fee distribution.

Early Premium Participants purchasing 10,000+ POWER in a single transaction (First 100 slots): Eligible for the 5% Operational Reward Pool + POLX fee distribution.

- **Eligibility:** Applied to Early Premium Participants who purchase 5,000 POLIX Power or more in a single transaction.
- **Funding** (Fee Distribution Pool): 30% to 50% of all POLX fees generated from settlements, withdrawals, and conversion purchases will be allocated to the distribution pool (the remainder will be burned or used as reserves).
- **Distribution Basis** (Weekly Average Method): To prevent short-term exploitation, payouts are calculated based on the 7-day average of the user's daily THBC staked amount from Monday to Sunday of the previous week.
- **Payout Schedule & Condition:** Distributed every Monday; staking must remain active at the time of payout.
- **Individual Payout Formula:**  $\text{Weekly Fee Distribution Pool} \times (\text{Individual Average Staked Amount} \div \text{Total Average Staked Amount of All Eligible Participants})$

# 11. Executive Summary

- **Project Goal:** Aiming to build a next-generation global prediction market ecosystem where future information and probabilities are traded.
- **Early Onboarding** (Purchasing POLIX Power): Users sign up via a referral link and deposit USDT to purchase 'POLIX Power' (deposited USDT is non-withdrawable).
- **Earning THBC Rewards:** Members receive daily THBC rewards (valued at 1 THBC = 0.025 USDT) based on their held POLIX Power and mini-prediction game participation. Generational referral and community rank rewards are also awarded based on downline performance.
- **THBC Staking & Utility:** Staking distributed THBC grants daily POLX rewards. THBC can be used to repurchase POLIX Power (with a 30% deduction), settle for withdrawals, or pay system fees.
- **Prior to DEX listing,** users can withdraw funds to external wallets by settling THBC at its USDT-pegged value (Fees: 30% when paid in THBC, 10% when paid in POLX).
- **POLX Utility & Restrictions:** POLX is used for Power conversion purchases (with a 10% deduction), external withdrawals (10% fee), and fee payments. Re-depositing POLX from an external wallet back into the site is strictly prohibited.
- **Ultimate Vision:** Upon the official launch of the Future Prediction Platform, early participants will expand their roles into active game playing, topic bidding/proposing, and content creation. Early and Core Premium Participants will enjoy exclusive benefits, including POLX fee distributions and participation in operational performance reward pools.

# The Future of Prediction Markets
