Pokemon GO - a fascinating adventure android game in which gamers will have to move to an alternate reality and collect Pokemon. The video game is based on the famous cartoon of the same name. This time, in a distinction from other platforms, including Nintendo, gamers will need to get out on the street and turn into a first-class mentor of funny mysterious creatures Pokemon. The toy does not require special knowledge and training, everything is simple and clear, it is closely related to the interaction with the real world: to play - you need to go to the streets of a wonderful city, activate the satellite navigation system and search for tiny monsters - Pokemon. Wandering in another reality, the player will encounter familiar animated characters from the cartoon Pokemon. Finding a small Pokemon on the map - this creature must first catch: to clap on its avatar and immediately begin the battle, which takes place in several modes: added reality or in the absence of it. In the initial case, a special camera is used - Pokemon is depicted on the touch screen of your tablet or mobile device, in all sorts of ways evading and resisting capture, the second case will be calculated for players with weak devices - the second case will be designed for players with weak devices - that won't be hard to catch.
