Buy Smart Measure Pro online or at a retailer near you. Smart Measure measures the object's steps are very simple, we first put the phone to the bottom of the detecting object to take a picture, maintain the same posture, and then the phone camera lens pointed to the highest point of the object, and then press the forest key to get the height of the object in real time. To measure degrees more accurately, you can set the height of the holder, that is, about 30 cm minus the height, and calibrate, as long as the phone near the wall, and then press Calibrate, and developers are more suggested that we make more calibrations, the effect will be better. In addition, you will record the height of the object, you can press the recording key again, the height will be locked. Smart Measure is a mobile phone software, not a professional measuring tool, so the result will have an error of about 10%, it is recommended to repeatedly measure and take the median.
